

Intact Web Services Application

The new Intact Web Portal Module allows Intact Users to provide "anywhere access" to their Customers. There is no special client software so basically, Customers can access their data from any device that has Internet Access.

- Home PC's
- Office PC's
- Public Access Terminals
- Personal Digital Assistants (PDA's)
- Mobile Phones

News: INTACT Release new eCommerce Web Portal to give their customers a turnkey ecommerce solution

Featured Items: INTACT Mobile - The web portal is also available on mobile phones that support web access via 3G or GPRS.

Notes: Notes

Any questions? Questions answered...

"More and more companies want to do business electronically and INTACT leads the way"

Using the Web Services Application, Intact have developed the Web Portal. This provides Intact Users with an option to provide their Customers with "anywhere, anytime access" to their data. Customers can check their balance, view and reprint invoices, check credit status, place orders, check stock & view account history.

Once the Customer is given a User Name and Password, they can go onto the website and immediately view REAL TIME information. The data is not uploaded and downloaded at intervals - data is directly retrieved as and when it is asked for.
